**Preliminary Amendment** 

## ABSTRACT OF THE DISCLOSURE

The invention relates to the use of a composition for cleaning the outside of a means of transport. The composition contains component a) at least one tertiary amino oxide of formula R<sub>1</sub>R<sub>2</sub>R<sub>3</sub>NO, whereby R<sub>1</sub> represents an alkylamidoalkyl, alkenylamidoalkyl, alkoxypropylamidoalkyl or alkenylamidoalkyl group having between 8 -18 carbon atoms, R<sub>2</sub> and R<sub>3</sub> represent, independently from each other, low molecular alkyl radicals or hydroxyethyl radicals or hydroxypropyl radicals, and component b) at least one alkali metal salt of polyasparaginic acid having a molecular weight of between 5,000 g/mol - 50,000 g/mol, or a polyglutaminic acid having a molecular weight of between 5,000 g/mol - 50,000 g/mol, or a mixture of both substances, whereby the weight ratio of the components a:b is between 10:1 and 3000:1. The cleaner of the present invention effectively removes dirt and comprises environmentally friendly corrosion inhibitors.
